INDUSTRY 4.0 - Intelligent Business Management

In order to prepare the production units of our clients and potential clients to the evolutionary challenges lying ahead in the industry (so-called 4th stage of Industry), SISTRADE aim is to naturally help this change with the solutions that enable the complete digitization of production systems through the interconnection of equipment, people and processes, thus allowing for maximization of overall efficiency in organizations.

SISTRADE, in its ERP includes **Manufacturing Execution Systems (MES) in Cloud**, which allows **the use of mobile equipment and devices for data collection on the shop floor, eliminating the paper flow in organizations and offering real time data analysis** with the help of **Business Intelligence (BI) and SmartStatistics** for processing the huge volumes of data (Big Data), in order to generate information appropriate for fast decision making, which leads to increased productivity, it already lies perfectly aligned with some of the pillars of this 4th stage of industrialization.

The organizations using Sistrade solutions take advantage of the benefits arising therefrom, including waste reduction, cost reduction, optimization of stocks, equipment setup times and delivery times, thereby taking a predictive approach in the use of their productive resources.

SISTRADE TEAM AT ECMA CONGRESS 2016

SISTRADE participated in ECMA Annual Congress in Antibes/Juan-les-Pins (France) from 14 until 17 September, 2016. This year's theme was: 'Big Data – The New Folding Carton Industry'. A great line-up of international acknowledged experts and trend watchers showed the huge influence of Big Data on the future of the industry.

The purpose of participation in ECMA Annual Congress has to do with the continued commitment of SISTRADE to be present in the main forums, contributing to learning and knowledge of the latest trends and developments in the cartons sector, using this information as marketing research to identify new opportunities.
