YOUR
PURCHASES**

#4

MAKE A DISTRIBUTION PLAN

A well-defined delivery plan is the first step to successful distribution.

Start with phasing your deliveries by date or by warehouse. For an even more efficient planning, immediately **affect a product with a given job order.**

After the approval, the system will **automatically allocate** the amount to that job order.

#5

WORKFLOW OF PURCHASES

Fast workflow system for purchase orders approval.

Dynamic and with an **intuitive interface**, allows the users to interact internally and with external entities, total or partially.

Once approved, the **purchase order is emailed directly to the supplier.**

#6

Swift and **precise invoicing** process that adds value to the company.

The software has a form where you can enter not only the **number** but also the **information** contained in the invoice.

The recorded **invoices** are **reflected in current accounts** and **available for payment**.

PRECISE INVOICING

Have a **full control of the warehouse.**

Track your inventory, know **when** and **what material** enters in stock or what is the status of supplier orders.

The **bar-code readers record stocks movements** and send information to the central system for timely **replacements of consumed material.**

#7

EFFECTIVE RECEPTION PROCESS

#8

MANAGE YOUR INVENTORY

Analyse inventory in a **simple** and **efficacious** way, automatically calculate the total quantity and total value of different product types.

Easily update and record inventory data after performing a calculation.

Manage stocks in a **cost-effective** way, taking into account **minimum stock**, **safety stock**, **point of order**, **quantity discounts** and much more.

#9

Reduce costs of the warehouse through **mobile solution**.

Optimize reception and shipping.

Streamline logistics and **reduce** the processing time spent on operations related to the warehouse.

GO MOBILE

#10

CONTROL YOUR NUMBERS

SmartStatistics provides complete information about the module.

Control your company **performance** through **reports**.

Purchase analysis and **indicators** of management, as well as **stock management** indicators are available.

Evaluate your **shipments** and **consumption control**.

A blurred background image of a factory interior. In the foreground, a white and blue industrial robotic arm is visible, holding a blue component. To the left, another mechanical part is partially visible. The background shows industrial structures and lights.
